Μπάλα Παντού

A six year plan “Football all around”

Hellenic Football Federation, having full awareness of its mission, comprehending the multi-faceted challenges of our times and taking into consideration international practices and requirements, paints a “new day” for Greek football.

Hellenic Football Federation, and more particularly the HFF’s Technical Committee, after first mapping the football and social developments with the appropriate diligence, moved on to processing and now presenting the new development plan: A plan with “reasoning and vision”, with a six-year horizon. The specific timetable was not set by chance. It was based on fundamental and symbolic reasons, given that 2024 will mark the 20-year anniversary of the Euro 2004 triumph.

The architecture of the new development plan is set out by four pillars, as presented herewith. Its goal is to mobilize -methodically and according to plan- the most extensive human resources possible, which, combined with the capitalization on knowhow and up-to-date tools, will upgrade the image of football across the country, at the same time promoting the values stemming from the most popular of sports.

Vision (Not only football)

- To propagate social messages through football
- To secure equal opportunities of participation for everyone
- To cooperate with FIFA, UEFA , Government, RFAs, educational community, public and social stakeholders
- To spread the joy of the game to vulnerable social groups (disabilities, refugees, veterans, juvenile offenders)
- To increase the number of volunteers

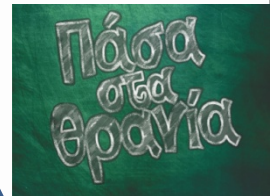

Our Development Project

It's a
Woman's
Game
